

## CENTRAL FLORIDA WATER TREATMENT SYSTEMS COMPANY WINS READERS CHOICE AWARDS

*Readers of the Fort Meade Leader and the Polk County Democrat in central Florida have just awarded water treatment systems and equipment company, Kinetico Quality Water Systems the Readers' Choice Award for "Best Water Treatment Company" of 2010. The awards, voted on by readers throughout Polk County, Florida, were given for both the best water treatment and the best water filter systems in the area.*

**Online PR News – 28-June-2011**— WINTER HAVEN, FL. June 10, 2011—Readers of the Fort Meade Leader and the Polk County Democrat in central Florida have just awarded water treatment systems and equipment company, Kinetico Quality Water Systems the Readers' Choice Award for "Best Water Treatment Company" of 2010. The awards, voted on by readers throughout Polk County, Florida, were given for both the [Best Water Treatment System](#) and the best water filter system in the area.

Kinetico Quality Water Systems of Polk County and their hard working employees were honored with this recognition: "The fact that our local neighbors voted on us having the best water filter and best water softener systems means a lot to us. Clean water is very important for the health and economy of the central Florida community, and we're glad to know that readers approve of how we're doing to accomplish those goals."

**The fact that our local neighbors voted on us having the best water filter and best water softener systems means a lot to us. Clean water is very important for the health and economy of the central Florida community, and we're glad to know that readers approve of how we're doing to accomplish those goals.**

---

Studies by the U.S. Geological Survey and Virginia Tech conclude that about 85% of the water in the United States is hard, and Florida is among the states with areas with very hard water. Kinetico explains, "Our water treatment systems are important for the area because they save a lot of money and trouble from problems caused by elevated calcium and magnesium deposits." Mineral build-up in pipes decreases plumbing efficiency and can shorten the life of appliances like dishwashers by 30%. "It can also take a toll on the environment because homes with hard water use considerably more detergents, shampoos and soaps to get the same effects as a household or business with softer water. Not treating the water in your home is like pouring money down the drain."

Kinetico Quality Water Systems also provides drinking water filtration systems that remove the contaminants increasingly found in tap water from aging municipal water systems, such as heavy metals, biological contaminants and unpleasant smells. "These water contaminants pose a health hazard for families in the area, which is why we've worked very hard to make sure we have the best water filter systems available,"

Kinetico believes that they won the Readers' Choice Award for "Best Water Treatment Company" because of their 40+ years of experience and service. "Not only do we have the best [whole house water treatment system](#)

and best water filter systems on the market, but we have a four-decade track record of standing behind what we install.”. “Another huge benefit of our water treatment systems is that they work without electricity, so that saves our customers a huge amount of money when electricity prices continue to rise. Our customers can also continue to enjoy clean, soft water, even during a power outage.”

Kinetico Quality Water Systems of Polk County has had an A+ rating with the Better Business Bureau since April 2003 and offers a [free water quality test](#) to any family or business interested in learning more about the quality of their water. “People can call us anytime, or fill out our online form to request a free water quality evaluation. We analyze the hardness of the water and test for any contaminants in the drinking water. Once we know how the water is, we can make recommendations for improving the water quality, and we’ll do whatever it takes to make our customers happy, save them money and keep them healthy.”
