

FarmVille Tools: Fast Harvest, Plow and Seed in the Game

Mar 10, 2010 – FarmVilleTools.com today announces the immediate availability of [FarmVille Tools](#) V2.3, an easy to use game tool that is used in FarmVille Game, which is a real-time farm simulation game available as the hottest application on the social networking website Facebook.

What happens with [FarmVille Tools](#) is that it acts as auto clicker when it comes to seeding one's crops, plowing, and harvesting. [FarmVille Tools](#) helps to make this process faster; It allows users to do this in a time frame of three seconds. Additionally, with the [FarmVille Tools](#), users are able to [automatically harvest](#) the produce once. [FarmVille Tools](#) comes with a mouse control facility that allows users to record all the clicks with the mouse recording tool. It is also effective when it comes to harvesting. By using it, users reduce on the risk of having the produce damaged. The [FarmVille Tools](#) helps users advance on FarmVille Game.

Users are able to manage and control how the crops are planted and grown. What happens is that users will level up and some crops will unlock hence creating difference in harvesting times. Users will also be able to manage the overcrowding of their produce. [FarmVille Tools](#) helps in even distribution of the crops. It is very effective for people with very vast land. [FarmVille Tools](#) helps when it comes to seed plantation and in the harvesting process. What users must be careful of is to ensure that they fence the farm. This will help the machine from going to harvest the neighbors produce.

Features:

- Easy to use. [FarmVille Tools](#) allows users to harvest, plow and seed their farm within 3 clicks.
- Fast and automatically. [FarmVille Tools](#) will [automatically harvest](#) or seed the farm in few seconds.
- Harvest when users were away. [FarmVille Tools](#) can record and redo users mouse actions even if users were away from their PC.
