

The March 2010 Rankings of the Best HTML Software Vendors Released by bestwebdesignagencies.com

The independent authority on web design and development, bestwebdesignagencies.com, released their HTML software reviews for March 2010. The best web design companies work with the best HTML software in order to produce top quality web designs.

~~Online PR News – 09-March-2010~~ Plymouth, IN – bestwebdesignagencies.com, the independent authority on the [best web design companies](#), released the March 2010 rankings of the [best HTML software](#). An experienced research team with the independent authority analyzed the thousands of applicant software vendors in order to find the top software available. Once the evaluations were complete they released their [HTML software reviews](#).

HTML software assists users in the development and management of HTML coding for websites to provide an appealing site that is functional across various internet browsers. Every program has its unique set of features and tools that attempt to separate them from the rest of the industry. However, at the end of the day it takes an independent authority with knowledge and experience to help determine which are the best programs in the industry.

The top HTML software vendors for March 2010 are:

Is the software able to edit a wide variety of documents and integrate different types of content into a page to create an interactive site?

1. Adobe Dreamweaver
2. Microsoft Expression Web
3. Kompozer
4. Microsoft Sharepoint Designer
5. First Page
6. CoffeeCup HTML Editor
7. HTML-Kit
8. Best Address HTML Editor
9. RapidWeaver
10. BlueFish

An experienced research team with the independent authority on web design and development reviewed the various HTML programs that applied to be recognized. They analyzed the tools and features of each program. They then contacted at least three clients of each vendor in order to gain their perspective of working with the software. Questions are asked of clients such as, “Does the vendor provide an experienced support team able to provide insight on the operation of the application?” or “Is the software able to edit a wide variety of documents and integrate different types of content into a page to create an interactive site?”.
