Daimer Super Max 7000 AST

Daimer® introduces 16 machines supporting long hose technology for consistent pressure over 300 feet of hose and AST® for remote on/off control with the trigger.

Online PR News – 09-March-2010 WOBURN, MA U.S.A. – March 9, 2010 -- Daimer Industries®, known worldwide for advanced power washer design, announced 16 electric powered [pressure washer](#) systems with two technologies that facilitate the use of hoses up to 300 feet long. Long Hose Technology (LHT) maintains consistent pressure along the length of the hose. AST® (Automatic Shutoff Technology™) allows users to start and stop the machines using the trigger gun instead of walking to the machine to manually turn it off.

“We introduced LHT and AST in heated, non-heated, mobile and stationary machines,” says Matthew Baratta, a Daimer.com spokesman. “Cleaning professionals now have more flexibility: they can use our fuel-burning machines to clean indoors via a long hose and our stationary machines to reach places they never could before.”

Long Hoses Means Versatility

Daimer®'s LHT maintains consistent pressure from the beginning to the end of hoses up to 300-feet long with minimal drop off. A pressure washer without this design typically loses pressure after a certain distance. For fuel-, gas-, and propane-heated machines, this new technology also provides an added benefit: the base unit, which can produce exhaust, can be placed in a boiler room or even outdoors while

users clean inside hundreds of feet away.

With AST®, cleaning pros can turn [electrical pressure washer](#) machines on and off remotely using the trigger gun -- without having to return to the base unit to flip a power switch. This technology sends the machine into low-power mode after a short period of non-use. The pressure washer systems reactivate when a user squeezes the trigger.

The new electric-powered pressure washer machines bundled with the two technologies include: heated mobile machines (6000 AST, 7000 AST, 9000 AST, and 12000 series), heated stationary machines (15000 series) and the 6500 psi unheated stationary 20000 AST system.

Daimer® pressure washer machines come standard with 25 to 50 foot hoses, but the company offers a variety of other hoses sizes and quick-disconnect technology for daisy-chaining multiple lengths.

Get More Technical

For more details about Daimer high pressure washers, [mobile pressure washers](#) and cold water pressure washers or other pressure washing products visit www.daimer.com/pressure-washers/ or call Matthew Baratta at (888) 507-2220.

About Daimer Industries, Inc.®: Daimer®, www.daimer.com/, is a major supplier and worldwide exporter of the cleaning industry's leading line of KleenJet® steam cleaners/vapor steam cleaners/steam cleaning equipment; Super Max™ commercial and industrial pressure washers, including cold water, hot water, and steam pressure washing machines; XTreme Power® floor cleaners, including carpet cleaners, hard surface cleaners, and floor buffers/scrubbers/burnishers; and the line of Micro-Blasting® Eco-Green® environmentally friendly cleaning products that employ unique technologies and a patented, proprietary chemistry.
