

Cloud Hosting Provider Cloud.bg Announced New Affiliate Program

Cloud.bg, an innovative Cloud Hosting (<http://www.cloud.bg/en>) provider which enables website owners to use cPanel/WHM in a load-balanced clustered environment announced today the launch of its new cloud hosting Affiliate Program. The program offers attractive commissions per sale to company's affiliates.

Online PR News – 10-March-2010 Cloud.bg, a provider of a cPanel/WHM enabled [Cloud Hosting](http://www.cloud.bg/en) (<http://www.cloud.bg/en>) services has opened a new affiliate program today. The web hoster which provides Shared Cloud Hosting services priced at €20/month has reported that it gives its affiliates the opportunity to earn 18% commission per sale on SCloud (<http://www.cloud.bg/en/cloud-hosting>) plan. This percent accounts to €43.20 (approximately \$59 USD), a commission which company's partners get when anyone they send to Cloud.bg signs up for an annual contract with the web host.

Cloud.bg grants its own customers who decide to join the [Cloud Affiliate Program](http://www.cloud.bg/en/affiliate-program) (<http://www.cloud.bg/en/affiliate-program>) even better commission rate. They get 22% per sale make sales for one of the premier European Cloud hosts. This affiliate rate accounts to €52.97 (\$72 USD). It allows the company's customers to earn almost 3 times more on affiliate commissions than they spend with Cloud.bg on their own cloud hosting account.

Anyone who wants to register for the Cloud Hosting Affiliate Program (<http://www.cloud.bg/whmcs/affiliates.php>) can do this on the company's corporate website.

Cloud.bg - cPanel/WHM Enabled Cloud

Cloud.bg attracted a lot of attention in the web hosting industry this January when it announced the launch of the first Shared Cloud Hosting service in Europe which allows site owners to use the most popular hosting automation panel cPanel/WHM in a cloud environment. The web host uses Fuscan Linux Cloud (<http://www.fuscan.com>), a enterprise hosting automation platform of SingleOS to run cPanel/WHM on top of a load-balanced and a fully redundant clustered server infrastructure.

The company's customers take advantage from using a scalable hosting service without a need to dealing with a management of virtual environments. All site owners have to do is to use the cPanel familiar interface. Besides the [SCloud Hosting](http://www.cloud.bg/cloud-hosting) (<http://www.cloud.bg/cloud-hosting>) service mentioned above, the provider also offers Reseller Cloud Hosting accounts manageable through cPanel's WHM (Web Host Manager).

The standard affiliate commission of 18% applies also to Reseller Cloud Hosting plan. It provides Cloud.bg's affiliates with even better earnings for each new customers they send to the company.

The cloud hosting company has recently announced a promotional campaign over 12 different national top-level Domain Names (<http://www.cloud.bg/en/domains>) of European countries. From February 10th until March 31st 2010 Cloud.bg offers anyone who chooses Cloud.bg to move to the clouds to register or extend the registration of their .co.uk, .de, .fr, .es, .it, .at, .be, .nl, .dk, .li, .ch, .me and .eu domain names for

free. The registration process is fully automated for all domains. The only requirements that the cloud customers have to comply with are those of the national registries which operate the domain extensions.

In January the company announced that the average round-trip delay (RTT) time for European home users who ping Cloud.bg ranges from 1.5 ms to 60 ms. Pinged from London Cloud.bg is reachable for 47 ms or less, from Ljubljana, Slovenia - 35 ms, from Paris - 71 ms or less, from Madrid - 77, from Berlin - 47 ms, from Sofia, Bulgaria - 1.5 ms. The average RTT for Israel is 97 ms. The cloud is currently located in a facility owned and operated by Interoute, one of the premier European providers of data center solutions.
