The best web design and development agencies evaluated and ranked by bestwebdesignagencies.com

The best Symfony development firms were unveiled by the independent authority on the best web development firms, bestwebdesignagencies.com, for March 2010. Symfony development is a PHP based framework that assists developers in the quick deployment of web applications to create a dynamic site.

Online PR News – 15-March-2010 Plymouth, IN – The independent authority on the [best web development](#) firms, bestwebdesignagencies.com, released the March 2010 rankings of the best [Symfony development firms](#). Thousands of applicants were reviewed by an experienced research team. The companies that made the list demonstrated the best understanding of the development platform.

Symfony is a PHP-based application development framework that assists developers in quicker development of dynamic websites. Created by MIT, the scripting framework follows what is known as the model-view-controller paradigm. This allows for independent development of the of the domain logic from the user interface.

The best [Symfony developers](#) for March 2010 are:

1. Red Evolution
2. HexaDesigners
3. etonDIGITAL
4. Digital Base
5. DownArchive
6. Juicy Media Ltd.
7. Forma-Pro
8. Jimmyweb
9. Maple Design Ltd.
10. Hawaii Web Development

An assigned research team with bestwebdesignagencies.com reviewed the thousands of applicants seeking to be ranked in order to find the best Symfony development firm. They then contacted at least three clients

of each firm in order to gain their perspective. Each client is asked about their overall experience with the vendor as well as project specific questions such as, “How efficient is the work being completed?” and “Was the code tested across multiple browsers?”.
