

Premium Electronic Cigarette Now Offering New Disposable 'Quit Smoking Now' Cigars

Leading online retailer, Premium Electronic Cigarette offers top of the line electronic cigars to help cigar smokers stop smoking traditional cigars with disposable 'quit smoking now' electronic cigars.

Online PR News – 15-March-2010 VIRGINIA BEACH, VA - PremiumEcigarette.com is now offering an [electronic cigar](#) as an alternative to traditional cigars. Cigar smokers get the same flavors and tactile sensations by using an electronic cigar as they would a traditional cigar, without the disadvantages that come with cigar smoking - namely the second hand smoke, odor and dangerous chemicals of traditional cigars.

This high-tech alternative to traditional cigar smoking works when an electronic circuit is activated once the electronic cigar is inhaled and stops once the inhaling does. A light at the tip of the cigar illuminates when inhaled. When the light begins to fade, that indicates it's time to change the battery.

Providing an alternative to traditional cigars, these nonflammable cigars use a liquid cartridge that contains the nicotine. Designed as an alternative to the very popular [electronic cigarette](#), these cigars provide the user with 600 puffs and since they have no ability to start a fire they can be safely used in non-smoking areas. Other benefits of these e-cigars are that they contain none of the more than 4000 chemical toxins found in traditional cigars, and do not emit secondhand smoke.

Electronic cigars can also be used as an aid to [quit smoking now](#) traditional cigars. Since there is a controlled release of nicotine, the nicotine is controlled by the frequency of puffs. For cigar smokers trying to quit smoking now, these cigars will allow them to achieve that goal. The cigar cartridges come in four levels of nicotine - 0 milligrams, 6 milligrams, 11 milligrams, and 16 milligrams - to allow the user to gradually decrease the nicotine level if nicotine cessation is their goal.

"Many states are enacting legislation banning smoking cigars and cigarettes in public places, which makes it very hard on smokers. With an electronic cigarette or cigar, smokers feel free to enjoy a 'smoke' when they want and where they want without fear of being asked to stop," says owner Vitali Servutas.

In addition to single disposable e-cigars, PremiumEcigarette.com offers e-cigar kits complete with cigar, atomizer, cartridges, batteries and battery chargers. The site also offers disposable electronic cigars in a variety of colors. Each electronic cigar is available in either Cubana or traditional cigar tobacco flavor.

About PremiumEcigarette.com:
