EVOC-101 Web Lesson Summary

EVOC-101 Web™ approved for in-service and continuing education credit

Online PR News – 23-July-2010 Murray, UT – Applied Simulation Technologies, Inc. (AST) has been approved to provide online [emergency vehicle driver training](#) to meet in-service and continuing education requirements. The training boards for Indiana, Missouri, New Mexico, North Dakota, Oregon and South Carolina have provided notice that AST's [EVOC-101 Web™](#) program will qualify for credit.

Reginald Welles, AST's President and CEO stated, "Our team reviewed pertinent case law, emergency vehicle operation policy, best practices, agency statistics and available studies. Then we delivered EVOC-101 Web™ in a package that is designed to take full advantage of the web's growing interactive features." Speaking to the recent success of the EVOC-101 Web™ program, Welles continued, "That is the secret sauce that delivers the tremendous [reduction in accidents](#) that our clients are reporting."

AST's technical team created EVOC-101 Web™ in accordance with the strictest state and federal standards available for online training. These efforts ensured the content was appropriate for state approval. AST continues efforts to be approved by all states that currently certify online training.

AST is a training and safety technology company specializing in web-based and simulation-based training and related software. The company's unique approach to safety includes the use of electronic assistance technology and adaptive course content to focus on individual driver's needs. Further information may be obtained at AST's web site: www.appliedsimtech.com.
