Daimer's Vapor-Flo 8225

***Daimer® expands line of 8200-class machines with three new systems in different configurations that all offer fume-free performance in stationary and mobile form factors.***

***Online PR News – 27-July-2010*** WOBURN, MA, U.S.A. – July 27, 2010 -- Daimer Industries, Inc.®, recognized as the largest supplier of all [electric pressure washers](#), announced new Vapor-Flo® 8200 class systems: the 8225, 8250 and 8275. The machines offer pressure levels as high as 1700 psi, 0.4 GPM of rated water flow, and heating as high as 205°F. The machines generate no exhaust and minimal water usage. The equipment is ideal for customers seeking green cleaning.

"We decided to enhance our 8200 class of machines with new configurations for customers with exacting requirements," notes Daimer.com green cleaning spokesperson Matthew Baratta. "This is one of our [best electric power washers](#) offering both mobile and stationary options."

#### More Powerful Electric Pressure Washers

Each of the new Vapor-Flo® 8200 electric pressure washers supports non-heated and heated cleaning. The machine use electrical power – no fuels – to produce both pressure levels and heat.

The high pressure systems are based around institutional duty one horsepower motors covered by a complete year of warrantee protection backed by Daimer®. The machines use direct drive/continual-use pumps covered by five year warranties. The electric pressure washers come with high pressure 32-foot hoses and trigger wands with quick disconnect features. The machines can be purchased in versions configured for three phase 230V power or three phase 440V power.

The electrical heating units use advanced stainless steel coils to produce water as hot as 205°F in well under a minute.

The 8225 and 8275 are mobile/portable electric pressure washers mounted on industrial wheels. The 8250, a stationary system, is designed for static, repetitive applications. Both the mobile 8225 and non-mobile 8250 reside in no-rust metal cases. The mobile 8275 resides in a coated, non-chip, non-reactive, no-rust metal case.

For additional information about Daimer®'s line of industrial electric pressure washers, [1600 psi electric power washer](#) systems, and other high pressure washer machines, visit [www.daimer.com/pressure-washers/](http://www.daimer.com/pressure-washers/) or call Matthew Baratta at (888) 507-2220. Super Max™ power washers are available to customers in most countries.

About Daimer Industries, Inc.®: Daimer®, [www.daimer.com](http://www.daimer.com), is a major supplier and worldwide exporter of the cleaning industry's leading line of KleenJet® steam cleaners/vapor steam cleaners/steam cleaning equipment; Super Max™ commercial and industrial pressure washers, including cold water, hot water, and steam pressure washing machines; XTreme Power® floor cleaners, including carpet cleaners, hard surface cleaners, and floor buffers/scrubbers/burnishers; and the line of Micro-Blasting® Eco-Green® environmentally friendly cleaning products that employ unique technologies and a patented, proprietary chemistry.
