***Online PR News – 27-July-2010*** Jason Yaeger, Operations Manager for [Michigan data center](#) operator Online Tech, contributes his expertise and leadership to the Southeast Michigan chapter of 7x24 Exchange.

7x24 Exchange is a national non-profit organization promoting knowledge exchange for those who design, build, use and maintain mission-critical enterprise information infrastructures. With chapters all over the United States, their goal is to improve end-to-end reliability by promoting dialogue in their communities. The recently founded chapter is the first in Southeast Michigan and hopes to increase and encourage IT professionals in the area to share their knowledge and experiences.

“I saw this as a great opportunity to bring together IT professionals in the area and share our experiences. Running mission critical enterprise IT Infrastructure is no small task and we could all learn something from each other,” says Jason Yaeger.

Jason is currently a VP in the organization, helping organize their bi-annual conferences and maintaining the organization’s website at [www.7x24semichigan.org](http://www.7x24semichigan.org). Jason has over 10 years of IT management experience, working as the Director of Internet Operations at 20/20 Communications and currently as the Operations Manager for Midwest managed data center operator Online Tech. He recently appeared on the WWJ talk radio show Internet Advisor with Gary Baker, giving advice about internet security and [managed server](#) hosting options.

“I am looking forward to the first Southeast Michigan 7x24 Exchange conference this year. We have two great presenters and it will be a great networking opportunity for IT professionals across the Metro Detroit area,” says Jason.

To help kick off the chapter, their first conference is scheduled for September 14, 2010. Guest speakers for the event are Hewlett Packard and Active Power, and the topic of the meeting is on 'Containerized Data-centers and the Containerized Infrastructure That Supports Them.'

## About Online Tech

Online Tech ([www.onlinetech.com](http://www.onlinetech.com)) is one of the Midwest's premier managed data center operators. Online Tech owns and manages secure and reliable multi-tenant data centers in Michigan. With a full range of colocation, managed dedicated server, and [private cloud hosting](#) offerings, Online Tech's clients dramatically reduce their IT data center costs, operational risks and downtime. Industry leaders trust Online Tech's fully managed dedicated servers to insure their servers are always on, always online, and always safe.
