Daimer's KleenJet 300CS

New high-performance brushes for Daimer®'s 300CS machines cost only \$2.50 and rival accessory brushes sold for as much \$20.

Online PR News – 30-July-2010 WOBURN, MA, U.S.A. – July 30, 2010 -- Daimer Industries®, Inc., a full-service vendor of steam cleaners and accessories, is selling \$2.50 accessory brushes for its KleenJet® Pro Plus 300CS continuous-use machines. The brushes, available in three bristle types, are comparable to products being sold for as much as \$20.

"The 300CS is one of our [best steam cleaner](#) machines for small applications and we want to maintain its low cost of ownership," revealed Daimer.com accessory spokesman Matthew Baratta. "We developed these brushes for high performance and priced them at a fraction of what some competing sellers are charging."

Continuous Use Steam Cleaners, Low-Cost Accessories

Each of the 300CS steam cleaners comes with three styles of detail accessory brushes: nylon, brass and stainless steel. The materials refer to the type of bristles in the brush. Busy machine owners can use dozens of brushes over the life of the machines.

Daimer® has introduced a line of \$2.50 replacement brushes that are virtually identical to the brushes that come with the machines. The line includes brushes with the three bristle styles.

The varying bristle types are engineered to provide different degrees of abrasion depending on the application. Stainless steel bristles offer maximum abrasion for the most stubborn dirt and stains. Brass bristles are less abrasive but still stiff. Nylon offers the least abrasion and stiffness for the most delicate jobs, such as cleaning electrical components or grout.

The 300CS

The steam cleaners are Daimer®'s least expensive machines offering continuous refill tanks for lengthy periods of non-stop cleaning. The machines are equipped with 2 liter refill tanks and 2 liter boilers for a total capacity of 4 liters.

The 1600-watt machines support steam temperatures approaching 310°F and pressure levels approaching 75 psi. The systems feature an adjustable pressure level knob that allows users to match force to the application. The steam cleaners heat cold water to operating temperature in approximately 15 minutes.

For additional information about the new brushes, or Daimer® [grout steam cleaner](#) machines or [floor steam cleaners](#), visit www.daimer.com/steam-cleaners/ or call Matthew Baratta at (888) 507-2220. The steam cleaner systems are available to customers in most countries in 50 Hz and 60 Hz configurations. Minimum order quantities may apply.
