

Internet-Slots.org, a New Websites, Offers Slots Bonus, Jackpot and Internet Slots Information

InternetSlots.org, a new website committed to bringing the best offers in internet gaming into one place, has recently hit the web with impressive success.

Online PR News – 22-August-2010 Fresh off their debut, this website has managed to amass a flock of loyal followers. As their ranks grow, so too has their stable of gaming coverage. As their name suggest, **Internet Slots** focuses on web-based slot machines, which have made millions of dollars for millions of players across the globe.

What are the advantages to playing slots online? Besides the convenience factor, the games feature much larger jackpots and greater winning odds. By their very definition, these software slot machines boast an overhead of almost zero. This means that the operators of the online casinos pay an extremely low overhead, which allows them to pass the extra cash onto their players.

One of the best games featured at InternetSlots.org would have to be their Wheel of Fortune slots. These web-based machines showcase several of the same features which makes their television counterpart so popular. Their huge bonus wheel has yielded enormous winning to many players. Wheel of Fortune Slots can be found on several of the internet's most popular online casinos, though sometimes under different names. Rather than hunting down the variants one by one, you can find all of them posted conveniently at InternetSlots.org.

If you're in the mood for even bigger winnings, check out InternetSlots.org's listing of Progressive **Jackpot Slots**. These **Progressive Slots** games feature ever-increasing cash bonuses, which are taken straight from the amount used to spin the wheels for each play. Progressive Jackpots take one or two pennies from each spin, and add it to an ever increasing prize pool. This lump sum will then be awarded to a lucky player who spins a certain combination on the wheel. With thousands of players adding their pennies, who can tell how high these jackpots will climb? And the best part is that, once one is handed out, a new one instantly begins to build.

These are just two of the excellent categories of internet slots. Stop over to InternetSlots.org for all the best that the online gaming world has to offer.

About InternetSlots.org.
