Daimer's KleenJet 3050 CV

Daimer® announces four Supreme 3050CV machines for cleaning contractors seeking price, performance and filtrating technology.

Online PR News – 26-August-2010 WOBURN, MA, U.S.A. – August 26, 2010 -- Daimer Industries, Inc.®, established as a long-time source for cleaning contractors, announced a line of 50 Hz vacuum steam cleaner machines for janitorial professionals outside of North America. The midrange Supreme 3050CV line features an updated filtrating system that removes airborne waste, allergens and unhealthy effluvia.

"We're offering cleaning professionals outside North America that same value proposition we offered our domestic customers – the only difference is the support for 50 Hz power," said Daimer.com 50 Hz spokesperson Matthew Baratta. "The new steam cleaner machines include vacuum power, our latest filtrating technology and other options such as gum removal and sanitization."

Filtrating Steam Cleaner Machines

The Supreme 3050CV vacuum [steam cleaners](#) are sold in four configurations: 3050CV (standard vacuum systems), 3050CVP (with ATIS® sanitizing boiler system), 3050 CVG (with chewing gum eliminating system) and 3050 CVGP (with both ATIS® and gum elimination).

The base model 3050CV steam cleaner machines start with a 6.6 bar, 165°C steam cleaner. The machines house a warranted 5-liter boiler system. The machines have 2-liter detergent tanks and 4-liter automated-refill tanks.

For extraction, the steam cleaner machines have commercial-grade vacuums for both dry and wet applications. Each vacuum comes with a 3 meter steam hose. The filtrating technology operates with the vacuum and is composed of a swirling water filtering unit that captures foul odors and larger particles, plus a HEPA filtering element that traps microscopic particles such as allergens.

To the standard 50 Hz 3050CV, the line adds the following models with additional technologies:

- The 3050CVP offers an ATIS® antiseptic system that is EPA compliant and lab tested to kill dangerous germs and mold.
- The 3050 CVG includes Daimer®'s Gum Exterminator® peripheral unit that consists of a steam-based gum extraction system, a scrubbing unit and gum dissolver chemical.
- The 3050CVGP includes both the ATIS® and Gum Exterminator® features.

For additional information about the new steam cleaner machines, Daimer® [steam vacuum cleaner](#) systems, portable steam cleaner equipment and best steam cleaners for cleaning contractors, visit www.daimer.com/steam-cleaners/ or call Matthew Baratta at (888) 507-2220. The steam cleaner machines are available to customers in most countries. Minimum order quantities may apply.
