Daimier's Super Max 12880 JF

***Daimier®'s Super Max™ 12880 JF and 12885 JF accept either JP5 or JP8 jet fuel and offer convenience for airports, military and other air transport operations.***

***Online PR News – 01-September-2010*** WOBURN, MA, U.S.A. – September 1, 2010 -- Daimier Industries®, recognized globally as a full-service provider of industrial-grade [pressure washers](#), has announced two machines for the aviation industry that are heated and powered by jet fuel. The new Super Max™ 12880 JF and 12885 JF have been designed for airports, military, and other facilities that use jet fuel.

Each machine offers a water flow rated for 5 GPM. The 12880 JF offers pressure ratings nearing 3000 psi, while the 12885 JF can approach 3500 psi. The two systems are designed for maximum mobility and do not require electrical power.

"The two JF pressure washers run completely on jet fuel," noted Matthew Baratta, Daimier.com commercial industry spokesman. "The machines include Daimier®'s most popular technologies, such as LHT [Long Hose Technology] that allows fuel-burning machines to clean indoors via an extremely long hose."

#### Pressure Washers and Jet Fuel

Both of the [JF model pressure washers](#) include heat systems and engines that can run on JP5 or JP8 fuel types. The units offer continuous cleaning and high-performance direct drive pumps warranted by Daimier® for 5 years.

The new machines offer Daimier®'s multi-temperature tri-mode technology that supports cleaning with unheated and heated water as hot as 173°F or pressurized wet steam that can reach 226°F.

Both of the pressure washers are bundled with popular Daimier® features. LHT is designed to support

extended length hoses up to 300 feet long. Extended hoses allow users to place the fuel-burning units outside or in a boiler room and use a hose to clean far from exhaust fumes in hygiene-sensitive areas including food preparation and health-delivery facilities.

These pressure washers are sold with commercial-grade trigger wands with quick connect technology. A daisy chaining hose technology allows easy connecting and disconnecting of multiple segments.

Each machine comes with a selection of nozzles, including a steam hose. The 12880 JF and 12885 JF offer trailer mounting and high pressure chemical injection for chemical cleaning solutions. Optional support for multiple users and guns is also available.

For additional information about Daimer®'s line of [industrial pressure washers](#) , portable power washers and other pressure washing machines, [www.daimer.com/pressure-washers/](http://www.daimer.com/pressure-washers/) or call Matthew Baratta at (888) 507-2220. Super Max™ power washers are available to customers in most countries.

About Daimer Industries, Inc.®: Daimer®, [www.daimer.com](http://www.daimer.com) , is a major supplier and worldwide exporter of the cleaning industry's leading line of KleenJet® steam cleaners/vapor steam cleaners/steam cleaning equipment; Super Max™ commercial and industrial pressure washers, including cold water, hot water, and steam pressure washing machines; XTreme Power® floor cleaners, including carpet cleaners, hard surface cleaners, and floor buffers/scrubbers/burnishers; and the line of Micro-Blasting® Eco-Green® environmentally friendly cleaning products that employ unique technologies and a patented, proprietary chemistry.
