Daimer's XTreme Power XPH-9300U

Daimer®'s XPH-9300U-300 produces the highest heat and pressure in the XTreme Power® line of vehicle-interior cleaning systems.

Online PR News – 01-September-2010 WOBURN, MA, U.S.A. – September 1, 2010 - Daimer Industries, Inc.®, a leader in vehicle-interior cleaning systems, has shipped its most powerful XTreme Power® heated [auto detailing](#) system. The new XPH-9300U-300 provides carpet/upholstery cleaning with temperatures of nearly 210°F and pump pressures of nearly 300 psi -- approximately 20 percent more pressure than a comparable 250 psi model.

"This is our most advanced auto detailing machine designed for our busiest, most demanding customers," noted Matthew Baratta, auto detailing systems spokesperson at Daimer.com. "Each 9300U-300 provides the maximum heat and pressure levels in our vehicle-interior cleaning line of systems."

Max Heat and Pressure

Each XPH-9300U-300 auto detailing machine provides the most cleaning power in Daimer®'s upholstery/carpet cleaning line.

For heating, the machines employ two inline heating units that allow the systems to reach up to 210°F in under five minutes. When combined with the included Low Flow Technology liquid management system, carpets cleaned with the equipment dries in approximately two hours, while seating and upholstery can dry in approximately one hour.

In addition to high pump pressure for cleaning, the new auto detailing machines include dual vacuum motors for extraction. The vacuum system empties waste into a 15 gallon recovery tank designed for long periods of cleaning and less emptying down time.

The auto detailing machines include a 17 gallon tank for cleaning solution and two 25 foot hoses, one for

solution and the other for vacuum extraction. In addition, Daimer® provides a 4-inch, jet upholstery head. Other size heads are available for added cost.
