

## 1-800-GO-VAPOR.com Announces Free Accessory Set Valued at \$30

### *Set Is Included With Every Ladybug Steam Cleaner Order*

**Online PR News – 03-September-2010** To thank its customers for making them the go-to source for steam vapor cleaners, 1-800-GO-VAPOR.com is adding more [accessories to Ladybug steam cleaners](#). Today, the company announced a free accessory set valued at \$30 with every Ladybug order.

Believing that people should have a better, faster and healthier way to clean their homes, 1-800-GO-VAPOR.com in 1998, then called Vapor Systems, set out to revolutionize the cleaning industry. Enter the Vapor 2000. Using only ordinary tap water to clean, sanitize and deodorize almost any surface, this aqua-green steamer was powerful, lightweight, innovative, and an instant hit when it arrived from Italy.

Since then, satisfied customers in every state in the nation and seven foreign countries have helped 1-800-GO-VAPOR.com maintain an A+ rating with the Better Business Bureau, and the company has improved upon the quality and performance of the steamers it markets, adding Ladybug steam cleaners in 2008, which are the company's top-selling products today.

"Our intention has always been to offer the best," says V.K. Dunlop, 1-800-GO-VAPOR.com vice president. "That's why we turned to Ladybug. And to thank our customers for making 1-800-GO-VAPOR.com the nation's number one choice in vapor steam cleaners, for a limited time we're throwing in a free accessory set valued at \$30 with every Ladybug order."

[Ladybug vapor steam cleaners](#) are the most innovative, intricately designed and technologically advanced non-chemical based cleaning systems on the market today. The best-selling residential Ladybug Tekno 2350 steam cleaner and the industrial-strength MondoVap 2400 steam vapor sanitization system come standard with Ladybug's proprietary TANCS (Thermo Accelerated Nano Crystal Sanitation) technology.

"TANCS is so powerful and efficient at killing bacteria that the Tekno qualifies as a disinfection device for the U.S. Environmental Protection Agency," says Dunlop. "No other vapor steam cleaner can claim that."

All [Ladybug steam cleaners equipped with TANCS](#) have an EPA Establishment Number proudly displayed on the system.

According to Benjamin Tanner, president of Antimicrobial Test Laboratories, "The TANCS System has shown extraordinary results in laboratory tests. A 99.9999% reduction of MRSA and VRE on surfaces within 5 seconds is a level of performance that chemical disinfectants may never achieve."

Used in residential homes and apartments, hospitals, schools, nursing homes, restaurants, supermarkets, casinos, auto detailing shops, dental offices, animal shelters and other places where the highest level of cleanliness is required, Ladybug steam cleaners kill dust mites and bed bugs on contact, remove allergens, kill superbugs, and remove mold and mildew. They're ideal for cleaning and sanitizing tile floors, grout, kitchens and bathrooms, children's toys, workout rooms, auto interiors, scatter rugs, pet areas, and much

more.

Based in Lake Forest, Illinois, 1-800-GO-VAPOR.com is a leading nationwide marketer of Ladybug steam cleaners, the only steam cleaners that offer the patented TANCS technology. When equipped with TANCS, Ladybug steamers are certified by three leading independent laboratories to clean many times more effectively than standard chemical disinfectants.
