Daimer's KleenJet Mega 1000CVP

Daimer® has cut the prices of small trim brushes for its KleenJet® Mega 1000CVP disinfecting systems to \$2.50 – competitors sell comparable products for \$20.

Online PR News – 08-September-2010 WOBURN, MA, U.S.A. – September 8, 2010 -- Daimer Industries, Inc.®, a complete vendor of industrial cleaning supplies, has cut the prices of small trim brushes for its antiseptic KleenJet® Mega 1000CVP steam vacuum equipment. The trim brushes have been re-priced at \$2.50 and compare favorably with \$20 brushes being offered by competing vendors of steam cleaners.

"These antimicrobial [steam cleaning machines](#) come with Daimer®'s established ATIS® antiseptic technology, which has been tested to eradicate a host of hazardous germs," disclosed Matthew Baratta, Daimer.com antiseptic spokesman. "The brushes, available in three brush types, helped us lower the cost of owning one of these machines."

Trim Brush Accessories for Steam Cleaning Machines

Daimer® plans to offer three brush styles for its 1000CVP antimicrobial steam cleaning machines. The stainless steel style has been engineered to address the toughest deposits and baked on gunk found on manufacturing equipment, food preparation surfaces, and other applications requiring the highest abrasion levels.

Brass-style brushes include slightly softer bristles for applications requiring less friction. Nylon-style bristles offer the least friction for the most delicate applications and surfaces.

Daimer® said that trim brushes account for as much as 90 percent of a steam cleaning machines' owners' after-purchase costs.

Daimer®'s 1000CVP

The midrange vacuum steam cleaning machines offer industrial-caliber extraction with HEPA filtration and ATIS® antimicrobial engineering. The ATIS® technology offers EPA-compliance and has been proved on a variety of germs, including hospital-based MRSA bacterium, common mold, and salmonella.

The vacuum-based equipment comes with: a 4 Liter boiler, 3 Liters of detergent storage and 5 Liters of extraction waste capacity. These institutional-grade extractors generate 2200mm of assigned water column lift.
